Material properties PLA:

PLA tableware is made by polymerizing lactic acid obtained from plants (corn, sugar cane --> renewable raw materials) instead of petroleum and is also biodegradable and compostable.

Compared to conventional plastic, it causes ca. 60% less CO2 emissions.

The advantages of PLA tableware overview:

- · Completely biodegradable
- Compostable
- · Odorless and tasteless
- · Suitable for hot and cold dishes
- Temperature resistant from -20°C to 120°C (maximum 60 minutes)
- Microwave and dishwasher safe
- BPA-free

Koziol has been using biocircular plastic since 2021.

This is recycled from discarded sunflower and rapeseed oil from industry and the catering sector. The oils are collected and converted into plastic in a special recycling process. This is the first time that these materials have been put to good use, previously they could only be thermally recycled. Furthermore, no additional farmland is required. The material is dishwasher-safe, food-safe and fully recyclable.

silwy® MAGNETIC HARNESS

There is a magnet in the bottom of the tableware, which has a metal coaster as a counter pole. Thanks to a gel layer, the coasters adhere to almost all surfaces and therefore guarantee a firm hold. They can be removed without leaving any residue and can be reused as often as required.

Robust magnetic plastic glasses

Foldable hanging waste garbage can 5 liters or 8 liters (with lid)

- Easy to hang on cupboard doors etc.
- Folds up to save space when not in use
- For at home or on the go
- · Rail for securing the bin liner

The foldable waste garbage can holds 5 or 8 liters and is suitable for hanging on cupboard doors, drawers, etc. (up to max. 1,8 cm thick). When not in use, it is folded up and therefore takes up hardly any space. When in use, the bin liner can be fixed in place thanks to a rail. The foldable garbage can is not only suitable for use at home but also for campers looking for space-saving solutions. Material: PP/TPR.
